01 ABOUT ME

Summary

Although I studied graphic design, I have always focused my career on the web. Over **almost 20 years of professional experience**, I have worked in different environments (in-house, agencies and consulting firms) and experienced first-hand how the industry has evolved.

I spent most of my career as a UX Designer at Flat 101, one of the leading companies in Spain, where my **versatility** and **experience** led me to take on management responsibilities.

I currently work as a **Senior Digital Product Designer at Accenture,** where I also take on some **Team Lead** responsibilities.

Highlights

- Selected for **"Future Leaders 2023"**, the talent program for managers of Flat 101, led by Alquimia and held at Indra's facilities.
- Promoted to **Design Manager in 2023**, leading **teams of 6 to 12 people**, getting improvements in technical efficiency, operations, and team engagement.
- Member of Flat 101 **Design Department Management Committee since 2022**, contributing to the strategic planning and key decision-making for the area.
- **Design lead on major projects** for clients such as MAPFRE, L'Oréal, ALSA, and IESE Publishing.
- Rethinking of the **heuristic analysis process**, optimizing workflow and increasing the identification of actionable insights.
- Development of a **system for flow organization and page structure in Figma**, that significantly **reduced the onboarding tim**e for stakeholders.
- Creation of a **writing guide** for "ami", MAPFRE's virtual assistant, where define its voice, tone, formats, and editorial rules.
- UX/UI design and functional documentation of a **conversational interface** for **GSK**, as part of a POC on agent **orchestration** to optimise supply chain processes.
- Design and evolution of **GSK's internal tool** for viewing **KPI-based reports** across different business units.
- Development of the **Design System** for the new **Junta de Extremadura** website, defining foundations, variables, components and documentation, with the support of Claude connected to Figma.

02 WHAT I AM LIKE

Soft Skills

Versatile and multifaceted

With nearly 20 years of experience in interface and user experience design, I've had the chance to contribute in all phases of a project from multiple perspectives.

Throughout my time at Flat 101, I've gained experience applying techniques such as **heuristic analysis, benchmarking, customer journey mapping, wireframing, prototyping, animations and microinteractions, visual design, UI kits and design systems, UX writing, A/B testing, and QA.**

Customer centric and results oriented

In the last years I've been the main point of contact for the Design area in numerous projects, which has given me **extensive experience in client communication and relationship management**.

Team player with leadership skills

I easily adapt to new teams, quickly absorbing existing dynamics and building strong connections with teammates to achieve common goals.

As a manager, I've led both client and internal project teams, achieving satisfactory results while having excellent synergy within my squad.

03 WHAT I CAN DO

Hard Skills

UI Design

- Accessible and responsive visual design
- Application design
- UI Kits and Design Systems design
- Microinteractions
- Motion design
- Animated prototypes (Figma and Animate)

Wireframing and prototyping

- Wireframing conceptualization
- Interactive prototypes.

Research and analysis

- Heuristic analysis
- Benchmarking
- Customer journey maps
- Card sorting y tree testing (Optimal)

AI applied to design

- Copilot and Claude for design process support and documentation
- Interface generation and prototyping with Claude Code + Figma
- Interactive prototyping with Claude Code / Figma Make

Management

- Presentation and advocacy of proposals to executive leadership and clients
- Documentation of design processes and decision-making
- Prioritization of the design roadmap
- Allocation and monitoring of team workloads
- Performance evaluations and individual growth plans
- Stakeholder management
- Onboarding and coaching of junior, mid-level, and senior profiles
- Review and validation of deliverables

Validation and testing

- A/B testing and feedback-based iteration
- Visual and functional QA

Information architecture

- Content organization .
- Flowcharts

UX Writing

- Microcopy
- Verbal architecture
- Voice and tone
- Creation of content guidelines

04 WHERE I HAVE WORKED

Work Experience

2025-Present
Accenture
Senior Digital Product Designer
